

PICS Asset Management Services (PAMS)

Site Surveys & Physical Inventory Reports

PICS Telecom International can provide on-site equipment surveys and physical inventories of all the assets at a site or located in a warehouse.

Asset Valuations

PICS Telecom International has a broad base of knowledge about both legacy and leading edge technology. Our marketing department is trained in appraising the value of equipment from circuit boards to complete switch sites.

De-installation Services

PICS Telecom International has comprehensive procedures enabling us to perform efficient and effective de-installations. This maintains the integrity and the value of the equipment.

Handling & Packaging

With PICS Telecom International you have the confidence that your equipment will be handled in a professional and responsible manner. You can count on PICS Telecom International for consistent quality. PICS Telecom International is a Certified ISO 9001 Company.

Logistics & Transportation Support

PICS Telecom International provides coordination of logistics companies to transport equipment in the safest and most efficient manner.

"Green" Recycling Capabilities

PICS Telecom International will utilize only certified hazardous material handlers for disposal of such materials. All required documentation will be obtained from the smelters and other disposal companies.

PICS Asset Management Services (PAMS)

Warehousing Services

As equipment is received at any of the PICS Telecom International facilities, a complete inventory is taken down to the component level.

Telcordia Based Inventories

Telcordia® COMMON LANGUAGE® Equipment Information Service provides a consistent, meaningful and unique method of identifying equipment, its capabilities and its classifications.

Receiving/Reconciliation Reports

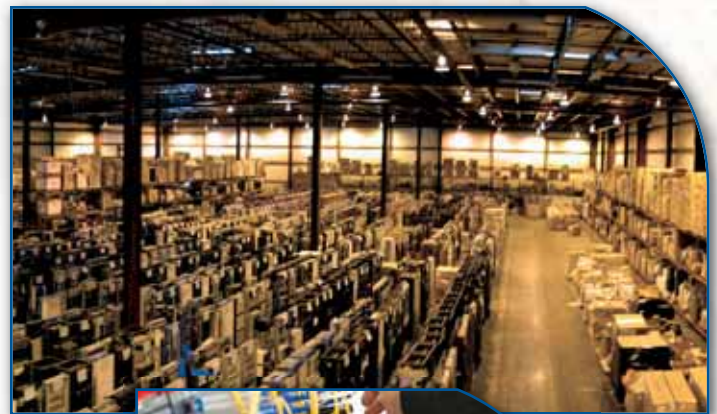

PICS Telecom International has a powerful MIS system that provides comprehensive information to our staff. This advanced system provides instant equipment availability, tracking information, historical pricing, customer files and a Telcordia database for verification of part numbers.

Spares Management & Redeployment Program

PICS Telecom International's Spares Program enables customers to maintain 100% network uptime. A customized Spares Program designed to meet your specific needs includes a choice of warehousing options, testing, refurbishment, repair and logistical support.

Repair & Replace Program

PICS Telecom International's experienced staff offers the capability to process many types of equipment. We can repair the existing equipment or recommend an identical, fully warrantied replacement.
